Uconnect TM 7" Radio Live NAV Touchscreen con DAB, Bluetooth, USB/AUX-IN

Volante in pelle con comandi radio

Fuel consumption and CO2 Emissions :

CO2 Emissions, WLTP combined (g/km): **not available**

Fuel consumption, WLTP combined (l/100km):

not available

The value of CO2 emissions is defined on the basis of official tests in accordance with the provisions of EU Regulation in force at the time of type approval.

The specification (A) indicates the value of CO2 determined on the basis of the NEDC cycle as per Regulation (EU) 692/2008.

The specification (B) indicates the value of CO2 determined on the basis of the measurement / correlation method referring to the NEDC cycle as per Regulation (EU) 2017/1152-1153.

The specification (C) indicates the value of CO2 determined on the basis of the new WLTP test procedure as per Regulation

The CO2 and fuel consumption values obtained according to the applicable legislation are indicated in order to allow the comparison of vehicle data. The homologation values of CO2 and fuel consumption may not reflect the actual values of CO2 and fuel consumption, which depend on many factors related, by way of example but not limitation,, to the driving style, the route, the weather and road conditions; the condition, use and equipment of the vehicle.

The reported values of CO2 and fuel consumption refer to the basic version of the vehicle and may change during the next configuration phase depending on the type of equipment and / or the size of the tyres which will be selected.

In any case, the official CO2 values and fuel consumption of the vehicle purchased by the customer will be supplied with the documents accompanying the vehicle.

In cases where the values of CO2 and fuel consumption are relevant for the purposes of calculating taxes and costs related to the vehicle, reference should be made to the applicable laws in each country.

The value of CO2 and fuel consumption contained in this document summarising the selected configuration refers to the vehicle including all the equipment, accessories and tyres which had been chosen during the configuration.

The CO2 values and fuel consumption of the configured vehicle are not definitive and may evolve as a result of changes in the production cycle; more up-to-date values will be available at the official dealer of the chosen FCA network.

In any case, the official CO2 values and fuel consumption of the vehicle purchased by the customer will be supplied with the documents accompanying the vehicle.

In cases where the values of CO2 and fuel consumption are relevant for the purposes of calculating taxes and costs related to the vehicle, reference should be made to the applicable laws in each country.
